Icelab Networks
Shared Colocation Services

Colocation with Icelab Networks is a reliable alternative to leasing dedicated server systems, geared for administrators or small businesses that already manage their own equipment. You get all the advantages of a Class A datacenter facility without incurring the costs of a full or half rack.

FEATURES

Customers enjoy a wide range of standard and advanced facility features including:

- Wireless Internet Access Available
- 24x7 On-Site Support and Remote Reboot
- 24x7 Facility Access
- 100 Mbps Multi-Homed Internet Access
- Real-Time Traffic Statistics

REDUNDANT NETWORK

A carrier neutral network is important when choosing a colocation solution for your mission critical systems. If a provider fails, traffic is automatically re-routed over the next available path keeping your systems online and available to your customers with a 99.99% guarantee. Carriers currently include AT&T, Level3, and Savvis.

24x7 ON-SITE SUPPORT

Icelab Networks provides basic remote hands work free of charge for up to 1 hour per month. Additionally more involved work such as hardware modifications, server maintenance, or changes to your software can be performed for a small hourly fee.

Description	System	Port	Status	Traffic Total	Traffic Limit	95th Percentile	Cost
igloo.icelab.net	sw1	4	active	67 GB	100 GB	2.78	$ 0

REAL-TIME TRAFFIC MONITORING

Get an up-to-the-minute customized view of your traffic statistics with our web-based monitoring tools. Know where you stand with your current throughput rate, total transfer used, and a 95th percentile report.

Icelab Networks is constantly monitoring traffic trends within the entire network. Should a noticeable anomaly arise from your equipment we will notify you right away.
