DATA SHEET · DENVER TECH CENTER

Server Colocation

Bring your own servers and network gear. We give them a secure, monitored home in the Denver Tech Center, with redundant power, multi-homed connectivity and engineers on call 24/7. You get the benefits of a Class A data center without paying for a full or half rack.

What's included

- ✓ 24/7 facility access
- ✓ One hour of remote hands each month
- ✓ Real-time traffic statistics
- ✓ Free 24/7 remote reboot
- ✓ Multi-homed connectivity from tier 1 carriers
- ✓ 99.99% uptime guarantee

01

Redundant network

Your traffic runs over multiple tier 1 carriers. If one fails, traffic reroutes automatically over the next available path, backed by our 99.99% uptime guarantee.

02

On-site support, 24/7

Basic remote hands work is free for up to one hour per month. Larger jobs, such as hardware changes, server maintenance or software work, are billed at an hourly rate.

03

Traffic monitoring

See your current throughput, total transfer and a 95th percentile report in a web-based dashboard. We watch traffic across the whole network and contact you right away if something unusual comes from your equipment.
